World-class security transformation consulting

Consulting

This is our unique and flagship consulting offering designed to build up your entire security program in line with International best-practices resulting in a riveting security transformation over a 12 months period. Delta Tech consultants will work with your IT team to ensure a rock-solid security program is implemented, from the trenches up.

This signature consulting offering is highly recommended for those customers who are deeply com-

mitted to achieving a real and lasting security implementation as per International benchmarks.

- 12 months Security Consulting
- Culminates In ISO27001:2013 (ISMS) certification
- Covers Entire Set of IT assets
- Based on Delta Tech Unique 4-Layer Transformation Methodology

Penetration testing (PT)

If you would like to quickly assess what risks and vulnerabilities exist in your published portals, mobile applications or within your data center, we strongly recommend the premium quality Delta Tech Penetration Testing service. Our expert and senior penetration testers (ethical hackers) will simulate an actual attack from the vantage point of an attacker resulting in a report listing vulnerabilities which may be exploited. Identify and fix your IT vulnerabilities before the hackers exploit them resulting in a data breach !

- External Blackbox Penetration Testing (Exposed Portals, Mobile Applications, DMZ)
- Internal Vulnerability Assessment (Servers, Workstations, & Network Devices)
- Internal Penetration Testing (DMZ & Data Center Servers)

Security gap analysis, security assessment & IT governance services

Delta Tech brings our valued customers a highly competent and experienced team of consultants with rich and diverse International experience. Our strong grip on global security best-practices and standards, coupled with thorough hands-on experience of local security projects enable us to differentiate with superior quality of services.

- Security Gap Analysis Against International Standards (ISMS, BCMS, PCI, COBIT, ITIL)
- Security Assessment Of IT Infrastructure Against Global Benchmarks
- IT Audit & IT Risk Assessment
- Implementation Of Regulatory Frameworks For Information Security & IT Governance

Next-generation cyber security products

Products

In order to aid our clients with a 360-degree security capability, Delta Tech brings you the world's cutting edge and leading range of Next-Generation Cyber Security products. Our security domain experts will help your organization design, implement, and operate the world's leading security products to ensure that your organizational defenses can ward off the latest malware & attack vectors.

Customized security transformation training

Training

Our rich and diversified experience in implementing world-class security for the telecoms, banking, enterprise, and government sectors within and outside Pakistan enables us to bring our valued customers premium security knowledge through our customized training offerings. We bring your real-world case studies, practical approaches and successful methodologies based on real projects based on International best-practices:

- Cyber Security Transformation
- Business Continuity Transformation
- Aligning IT Audit, Risk & Compliance For IT Governance Transformation
- Information Security Management System (ISO27001:2013) Through Delta Tech Unique Methodology (ISMS)
- Running An Effective Internal Vulnerability Management (VM) Program
- Application Security Transformation
